Spring Boot, Hibernate, JUnit, Mockito, Vue.js, Axios

Database Platforms:

PostgreSQL, Oracle, Microsoft SQL Server

Industry Concepts:

Full-stack, front-end, back-end, RDBMS, REST API using JSON, unit testing, source code management.

Areas of Expertise

- Agile Methodology
- Subject Matter Expert
- Continuous Learner
- Quality Assurance
- Documentation
- Database Management
- Mentor/Coach
- Troubleshooting
- Critical Thinking
- Technical Support
- Problem Solving
- Software Debugging
- Leadership
- Process Testing
- Communication Skills
- Teaching / Training
- Product Development
- Collaborative Team Player

Select Career Accomplishments

- **Leadership / Project Management** - Led a team through all phases of a project management including creation, development, and implementation of set-top box software for a Canadian satellite company. Represented the company as a SME at the client's headquarters during integration testing.
- **Team Collaboration** - Contributed technical expertise on discussions with business professionals regarding all stages of product development of a software tool used by the marketing department to create and upload ads to DoubleClick. Provided valuable input about user experience, feasibility of technical implementation, and potential impact of requested features to create the best user experience possible.

- **Diversity and Inclusion** - Provided a safe and welcoming environment for LGBTQ+ students in a coding bootcamp. Advocated and educated all students on the topic ensuring transgender students felt comfortable and supported by their peers and colleagues rather than feeling misunderstood or attacked causing them to shut down emotionally.
- **Instructor / Mentor** – Tasked as the lead technical instructor for an intensive 14-week java coding bootcamp, supporting, mentoring and reskilling students from diverse backgrounds teaching the skills needed to be successful as an entry level software engineers resulting in over 90 percent placement rates and substantial salary increases and life changing career opportunities.

Career Experience

- Java Instructor, Tech Elevator, Philadelphia, PA** 9/2020-6/2024
- Delivered Java, SQL, Spring Boot, REST API, HTML, CSS, JavaScript, Vue.js instructional material.
 - Mentored students who were re-skilling themselves to be entry-level software developers.
